It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

In particular this document may not be distributed to any person, and the Options may not be offered or sold, in any country outside Australia and New Zealand

Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Securities.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquiries as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Please refer to Section 7.2 for further details.

Risk Factors

Shareholders should be aware that there are a number of risks factors affecting the Company and the value of its Securities. The key risk factors of which Shareholders should be aware are set out in Section 6. These risks together with other general risks applicable to all investments in listed securities not specifically referred to, may affect the value of the Securities in the future. Accordingly, an investment in the Company should be considered highly speculative. Shareholders should consider consulting their professional advisers in relation to the issue of Securities pursuant to this Prospectus.

Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will apply to participate in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company.

Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Securities issued to them

under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

Photographs used in this Prospectus which do not have descriptions are for illustration only and should not be interpreted to mean that any person shown endorses the Prospectus or its contents or that the assets shown in them are owned by the Company. The distribution of this Prospectus in jurisdictions outside Australia may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe any of these restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

4. PURPOSE AND EFFECT OF THE OFFERS

4.1 Purpose and effect of the Options Offer

The purpose of the Options Offer is to reward Shareholders for supporting the Company and to provide the Company with a potential source of additional capital if Bonus Options are exercised. No funds will be raised through the issue of the Bonus Options pursuant to this Prospectus, however if all the Bonus Options are exercised, the Company will receive approximately \$5,983,985.

An additional purpose of the Options Offer is to remove any trading restrictions attaching to Shares issued on exercise of the Bonus Options issued under this Prospectus, so that, subject to ASX granting quotation of the Bonus Options, the investors who receive the Bonus Options will be enabled to trade those Bonus Options on a listed, public financial market, being the financial market operated by the ASX.

The principal effect of the Options Offer, assuming all Bonus Options offered under the Prospectus are issued, will be to increase the number of Options on issue from 3,600,000 prior to the date of this Prospectus to approximately 23,546,617 following completion of the Options Offer.

6. RISK FACTORS

6.1 Introduction

The Securities offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Shares.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

6.2 Company and Industry Specific Risks

Funding Risk	<p>At the date of this Prospectus, the Company has no income producing assets and will generate losses for the foreseeable future. Until it is able to develop a project and generate appropriate cash flow, it is dependent upon being able to obtain future equity or debt funding to support long term exploration. Neither the Company nor any of the Directors nor any other party can provide any guarantee or assurance that if further funding is required, such can be raised on terms favourable to the Company (or at all).</p> <p>Any additional equity funding will dilute existing Shareholders. Also, no guarantee or assurance can be given as to when a project can be developed to the stage where it will generate cash flow. As such, a project would be dependent on many factors, for example exploration success, subsequent development, commissioning and operational performance.</p>
Tenement applications	<p>The Tenements are at various stages of application and grant, specifically several of the Tenements for the Company's Errabiddy Project are still under application. There can be no assurance that the Tenement applications that are currently pending will be granted. There can be no assurance that if the Tenement is granted, it will be granted in its entirety. Additionally, some of the Tenement areas applied for may be excluded. The Company is unaware of any circumstances that would prevent the Tenement applications from being granted, however the consequence of being denied the applications for reasons beyond the control of the Company could be significant specifically for the Errabiddy Project.</p>
Tenure	<p>Mining and exploration tenements are subject to periodic renewal. The renewal of the term of granted tenements is subject to compliance with the applicable mining legislation and regulations and the discretion of the relevant mining authority. Renewal conditions may include increased expenditure and work commitments or compulsory relinquishment of areas of the tenements. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company. The Company considers the likelihood of tenure forfeiture to be low given the laws and regulations governing exploration in Western</p>

	<p>Australia and the ongoing expenditure budgeted for by the Company. However, the consequence of forfeiture or involuntary surrender of a granted tenements for reasons beyond the control of the Company could be significant.</p>
Exploration costs	<p>The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.</p>
Exploration success	<p>The Projects are at various stages of exploration, and potential investors should understand that mineral exploration and development are speculative and high-risk undertakings that may be impeded by circumstances and factors beyond the control of the Company. Success in this process involves, among other things:</p> <ul style="list-style-type: none"> (a) discovery and proving-up, or acquiring, an economically recoverable resource or reserve; (b) access to adequate capital throughout the acquisition, discovery and project development phases; (c) securing and maintaining title to Tenements; (d) obtaining required development consents and approvals necessary for the acquisition, exploration, development and production phases; and (e) accessing the necessary experienced operational staff, the applicable financial management and recruiting skilled contractors, consultants, and employees. <p>There can be no assurance that exploration of the Projects, or any other exploration properties that may be acquired in the future, will result in the discovery of an economic mineral resource. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.</p> <p>The Company has not published resource estimates for any prospects. There is no assurance that exploration or project studies by the Company will result in the definition of an economically viable mineral deposit.</p> <p>The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, changing government regulations and many other factors beyond the control of the Company.</p>
Coronavirus (COVID-19)	<p>The outbreak of the coronavirus disease (COVID-19) is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.</p> <p>In addition, the effects of COVID-19 on the Company's Share price and global financial markets generally may also affect the Company's ability</p>

	<p>to raise equity or require the Company to issue capital at a discount, which may in turn cause dilution to Shareholders.</p> <p>The COVID-19 pandemic may also give rise to issues, delays or restrictions in relation to land access and the Company's ability to freely move people and equipment to and from exploration projects may cause delays or cost increases.</p> <p>The Directors are monitoring the situation closely and have considered the impact of COVID-19 on the Company's business and financial performance. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain. If any of these impacts appear material prior to close of the Offer, the Company will notify investors under a supplementary prospectus.</p>
<p>Native title and Aboriginal Heritage</p>	<p>All of the Tenements are within the external boundaries of native title claims. In relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.</p> <p>Further to this, it is possible that an Indigenous Land Use Agreement (ILUA) may be registered against one or more of the tenements in which the Company has an interest. The terms and conditions of any such ILUA may be unfavourable for, or restrictive against, the Company.</p> <p>There are also areas or objects of Aboriginal heritage located on three of the Tenements.</p> <p>In addition, three of the Tenements contain Aboriginal heritage sites of significance which have been registered with the Department of Indigenous Affairs. Approvals are required if these sites will be impacted by exploration or mining activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programmes or mining activities.</p> <p>The Directors will closely monitor the potential effect of native title claims or Aboriginal heritage matters involving tenements in which the Company has or may have an interest.</p>

6.3 General Risks

<p>Regulatory Risks</p>	<p>The Company's operating activities are subject to extensive laws and regulations relating to numerous matters including resource licence consent, environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and heritage matters, protection of endangered and protected species and other matters. The Company requires permits from regulatory authorities and stakeholders to authorise the Company's operations. These permits relate to exploration, development, production and rehabilitation activities. While the Company believes that it is in substantial compliance with all material current laws and regulations affecting its activities, future changes in applicable laws, regulations, agreements or changes in their enforcement or regulatory interpretation could result in changes in legal requirements or in the terms of existing permits and agreements applicable to the Company or its properties, which could have a material adverse impact on the Company's current operations or</p>
--------------------------------	---

	<p>planned development projects. Obtaining necessary permits can be a time-consuming process and there is a risk that the Company will not obtain required permits on acceptable terms, in a timely manner or at all. The costs and delays associated with obtaining permits and complying with these permits and applicable laws and regulations could materially delay or restrict the Company from proceeding with the development of a Project or the operation or development of a mine. Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the Company's activities or forfeiture of one or more of the Tenements.</p>
Economic	<p>General economic conditions, introduction of tax reform, new legislation, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities. If activities cannot be funded, there is a risk that the Projects may have to be surrendered or not renewed. General economic conditions may also affect the value of Securities and its valuation regardless of its actual performance.</p>
Market conditions	<p>Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> (a) general economic outlook; (b) introduction of tax reform or other new legislation; (c) interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) terrorism or other hostilities. <p>The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p> <p>Shareholders should be aware that there are risks associated with any securities investment. Securities listed on the stock market, and in particular securities of exploration companies experience extreme price and volume fluctuations that have often been unrelated to the operating performance of such companies. These factors may materially affect the market price of the shares regardless of the Company's performance.</p>
Commodity price volatility and exchange rate risks	<p>If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors.</p> <p>Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency. This exposes the Company to the fluctuations and</p>

	volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.
Force Majeure	The Company's Projects may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.
Litigation risks	The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, reputation, financial performance, and financial position. The Company is not currently engaged in any litigation.
Speculative investment	The risk factors described above, and other risks factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Shares. Prospective investors should consider that an investment in the Company is highly speculative. There is no guarantee that the Shares offered under this Prospectus will provide a return on capital, payment of dividends or increases in the market value of those Shares. Before deciding whether to subscribe for Shares under this Prospectus you should read this Prospectus in its entirety and consider all factors, taking into account your objectives, financial situation and needs.
